716-489-1914

Jamestown, NY 14701

## Education

Bachelors of Science,  
Computer Science  
University at Buffalo  
Graduated: 2021

## Objective

*Well rounded, recent graduate from University at Buffalo with a BS in Computer Science. Looking forward to work alongside others to design and build user friendly and visually appealing applications.*

## Skills

HTML, CSS, PHP  
Python / Javascript  
MySQL / MongoDB  
Docker  
React, Flask, NetJS  
GitHub

## Experience

### ***Silver Bay YMCA***

Conference Services

2019 - 2019

- Worked alongside guests to ensure meetings spaces were held up to standards
- Provided troubleshooting assistance with campus technology (laptops, projectors, etc)

### ***Weber Knapp***

Floor Worker

2016 - 2017

- Inspected finished parts
- Racked and unracked manufactured parts on a powdercoat line

## Projects

### ***Government and COVID-19 relations feedback tracker***

- Used twitter API and carefully crafted queries to collect data from viable government figures/institutions along with regular citizens from select countries
- Developed webpages using HTML/CSS. Using javascript and google charts to display data in a more consumable manor.

### ***Social Space Game***

- Managed user data using MySQL along with utilizing proper user data storage techniques to minimize security issues
- Creating user registration logic within the flask backend

### ***Image Sharing Social Media Website***

- Created custom handlers to manage user inputted data
- Created react components to be used around the website as needed
- Designed the layout of the web application using Figma
